

AV Scenarios - Within Subject - Version 2

Start of Block: informed_consent

consent

Informed Consent

Participation is voluntary

It is your choice whether or not to participate in this research. If you choose to participate, you may change your mind and leave the study at any time. Refusal to participate or stopping your participation will involve no penalty or loss of benefits to which you are otherwise entitled.

What is the purpose of this research?

The purpose of this research is to examine human visual performance and judgments. All data from this experiment are gathered for scientific purposes and will contribute to our eventual understanding of brain and visual function. These data may be published in scientific journals so that other researchers may have access to these data.

How long will I take part in this research?

Your participation will take approximately 10 minutes to complete.

What can I expect if I take part in this research?

As a participant, you will be asked to look at images presented on a video display and give responses with key presses or movements of a mouse pointing device. Your response may involve responding as quickly as you can, memorizing what you saw, making a judgment, or completing a questionnaire. You will also be asked to complete a demographics form.

What are the risks and possible discomforts?

If you choose to participate, the effects should be comparable to those you would experience from viewing a computer monitor for 10 minutes and using a mouse or keyboard, e.g., eye fatigue. You are free to take breaks throughout the session. Some of the images and stories are mildly emotional, and some of the written stories are disgust-inducing.

Will I be compensated for participating in this research?

You will be compensated \$1 for this study. You will still receive payment if you withdraw early.

If I take part in this research, how will my privacy be protected? What happens to the

information you collect?

Your participation in this experiment will remain confidential, and your identity will not be stored with your data.

If I have any questions, concerns or complaints about this research study, who can I talk to?

The researcher for this study is Julian De Freitas who can be reached at 626.559.6401; #161 Morgan Hall, 15 Harvard Way, Boston MA, 02163; jdefreitas@hbs.edu. If you have questions, concerns, or complaints, If you would like to talk to the research team, If you think the research has harmed you, or If you wish to withdraw from the study.

This research has been reviewed by the Committee on the Use of Human Subjects in Research at Harvard University. They can be reached at 617-496-2847, 1350 Massachusetts Avenue, Suite 935, Cambridge, MA 02138, or cuhs@harvard.edu for any of the following: If your questions, concerns, or complaints are not being answered by the research team, If you cannot reach the research team, If you want to talk to someone besides the research team, or If you have questions about your rights as a research participant.

Start of Block: instruction

Q113 In this study, you will evaluate blame and negligence in a traffic accident scenario. You will watch videos depicting two scenarios. These scenarios will involve human-driven and automated vehicles.

End of Block: instruction

Start of Block: av_scenario

av_instruction

On the next page, you will watch an animated video of a traffic scenario depicted below. The video shows an intersection in which the driver of Vehicle A runs a stop sign and strikes Vehicle B, seriously injuring its occupant. **Vehicle B is a fully autonomous Robocar, which means that it is driven by a computer algorithm.**

Vehicle A is depicted in purple and Vehicle B is depicted in blue.

Page Break

video_av Please watch the following video. As a reminder, the video depicts an intersection in which the driver of Vehicle A runs a stop sign and strikes Vehicle B, seriously injuring its occupant. **Vehicle B is a fully autonomous Robocar, which means that it is driven by a computer algorithm.** After you see the clip once to get a feel for it, you will see it again and answer a few questions about the events that unfolded:

Q122

Please answer one more set of questions about the video below. Again, please refer to the following image when answering the questions. **Recall that Vehicle B is a fully autonomous Robocar, which means that it is driven by a computer algorithm.**

Page Break

counterfactual_AV

Now, please imagine that two people, Sam and Alex, are having the following discussion concerning what just happened:

Alex: "I wonder how things could have gone differently."

Sam: "Well, I really wonder what would've happened if the occupant of **Vehicle B** had more control of the vehicle."

Alex: "Really? Of all the ways things could have gone differently, that doesn't seem like the one that's worth thinking about."

Please rate the extent to which you agree with **Sam** below:

Page Break
